the intention of this unique title is to bridge the gap between psychiatry and neuroscience allowing a fruitful dialogue between both sciences recognizing that psychiatry has received important contributions from the basic neurosciences and that the basic neurosciences have received inspiration and objectives from the open problems of psychiatry psychiatry and neuroscience bridging the divide is designed to identify the borders trends and implications in both fields today comprehensive and developed by a renowned group of experts from both fields the book is divided into four parts epistemological considerations about the study of normal and abnormal human behaviors from basic neurosciences to human brain neurosciences learning teaching and the role of social environment and explaining human pathological behaviors from brain disorders to psychopathology a unique and invaluable addition to the literature in psychiatry and neuroscience psychiatry and neuroscience bridging the divide offers an important and clearer understanding of the relationship between psychiatry and neuroscience

the gold standard reference for all those who work with people with mental illness kaplan sadock s comprehensive textbook of psychiatry edited by drs robert boland and marcia l verduin has consistently kept pace with the rapid growth of research and knowledge in neural science as well as biological and psychological science this two volume eleventh edition offers the expertise of more than 600 renowned contributors who cover the full range of psychiatry and mental health including neural science genetics neuropsychiatry psychopharmacology and other key areas

the essays collected in this book constitute a new contribution to our understanding of the originality and significance of chekhov s prose a close textual analysis of his work is provided and especially of previously neglected works some long overdue for in depth investigation that chekhov himself rightfully considered to be masterpieces analysis of both these and other previously analyzed works offers a new interpretation which contrasts with those offered by previous chekhov scholars works examined include those dealing with chekhov s astonishingly accurate and artistic portrayal of a wide variety of illnesses without the use of

any medical terms these works are shown to be not mere clinical studies but genuine impressive works of art the author who suffered half of his life from tuberculosis effectively portrayed many characters afflicted with this disease which was incurable at the time many of these works reveal an indisputable symbiosis of the doctor and the artist chekhov maintained that in goethe the poet lived amicably side by side with the scientist a fitting description of him as well doctors the most frequently portrayed characters in chekhov s oeuvre are appropriately subjected to extensive analysis as are the themes of fate and death and dying that figure so prominently in chekhov s work attention is accorded to imaginative fictional works dealing with philosophy and the theme of crime and punishment as well as the island of sakhalin a narrative of non fictional sociological content

the food environment has changed dramatically and is now dominated by foods with unnaturally high levels of sugar fat and salt that are intensely rewarding scientific evidence has increased rapidly in the last few decades that these types of foods are capable of triggering addictive processes which may be a key driver in the rising rates of obesity and diet related disease around the globe food and addiction a comprehensive handbook second edition provides a multidisciplinary review of the most cutting edge science on the contribution of addictive processes to how we consume food top experts in the field of nutrition addiction psychology psychiatry neuroscience epidemiology public health marketing and policy come together to provide a scoping view of this rapidly evolving scientific area that has important implications for the well being and health of adults and children around the globe
